Users' Group News

Eighth International
Software AG
Users' Conference
June 9-13, 1980

Users of Software AG products are invited to attend the Eighth International Software AG Users' Conference, held at the Galleria Plaza in Houston, June 9-13, 1980.

As in the past, the Conference's technical agenda will include user presentations, change/enhancement sessions, workshops and a discussion of Software AG futures. Users' Group Business sessions have also been scheduled.

Conferees will choose to attend user presentations in three areas: ADABAS (and its associated products), COM-LETE, and the integrated ADABAS/COM-LETE environment. There will be concurrent presentations in these topical areas. A "Best Speaker" in each of these categories will be chosen by the Users' Group, and awarded \$1000.

In response to suggestions from last year's attendees, workshop sessions will be scheduled apart from user presentations. Among the ADABAS workshops are Restart/Recovery, Data Dictionary, DBA Tools, Education/Documentation, Performance. Concurrent COM-LETE workshops are also scheduled, corresponding to that product's Special Interest Groups. Additional workshops addressing other areas of user interest are also planned.

There will be separate Change/Enhancement sessions for ADABAS and COM-LETE. These will be organized as in previous Conferences,
